

Adding an Email Exchange account on the iOS device:

1. For iOS 14: Go To Settings > Mail > Accounts > Add Account
For iOS 12/13: Go To Settings > Passwords & Accounts > Add Account
For iOS 11: Go To Settings > Accounts & Passwords > Add Account
For iOS 10: Go to Settings > Mail > Account > Add Account

2. On the Add Account screen, tap Microsoft Exchange.

3. Enter the full email address in the Email field and your mailbox password in the Password field, then tap Next.

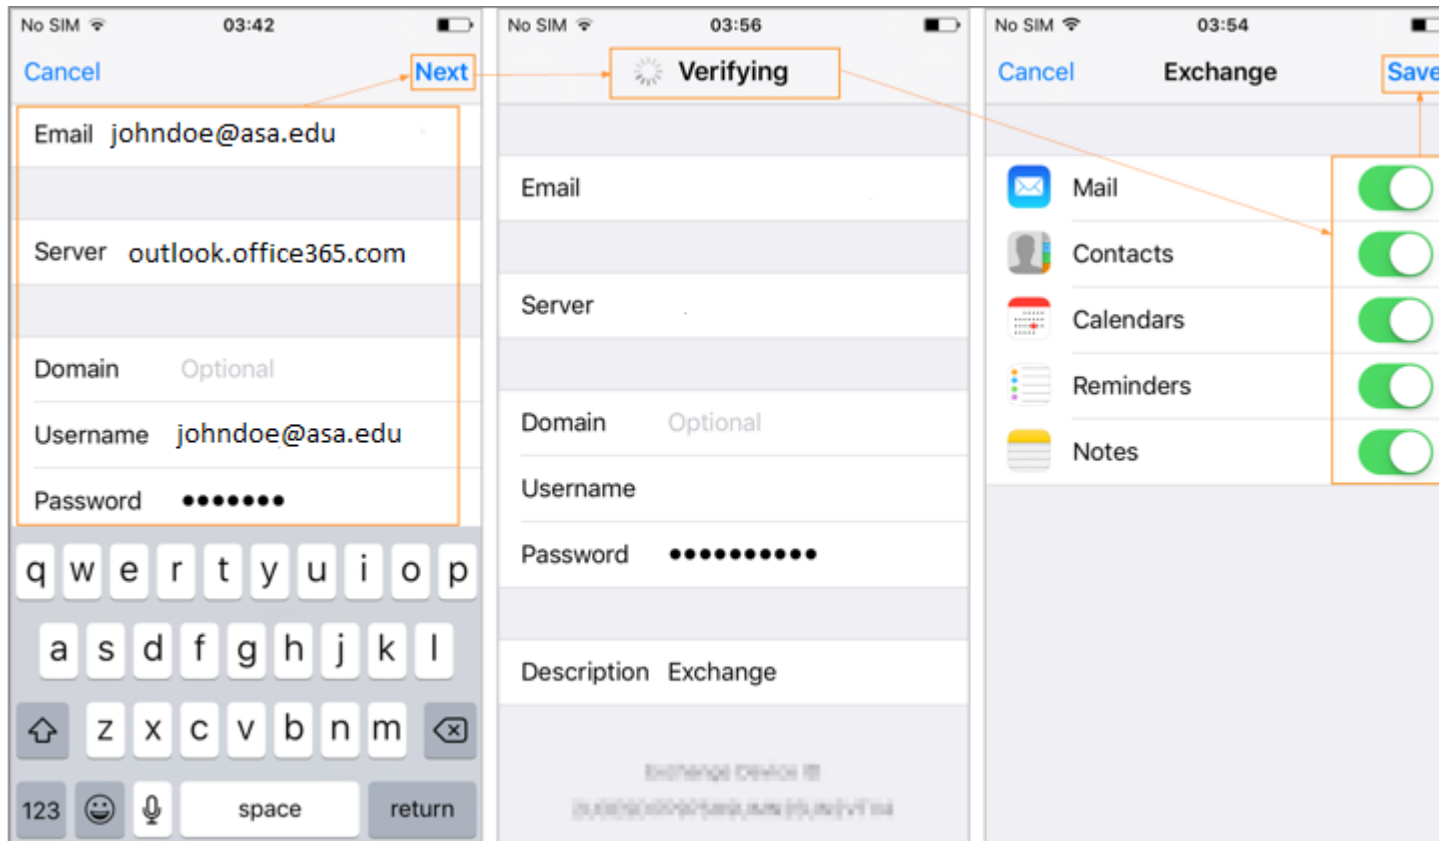

- The device will try to configure the Exchange server address automatically. If the server address can't be determined, you will be asked to enter it.

Server name: outlook.office365.com

Domain: leave it blank.

Username: specify the full email address

- The device offers to immediately sync with the Exchange server. If you choose not to sync at this time, you can turn on calendar and contact syncing later in Settings > Accounts & Passwords > Account, tap on your account

- To complete the setup process, tap Save
